## Superexploitation and Triple Oppression

Superexploitation of Black women: wage is driven down, and security eroded because they Black and women

Triple-oppression: proto-intersectionalism --> insists on the interdependence of Class, Race and Gender discrimination in serving oppression and that all three must be examined together and addressed together, fusing feminism with black solidarity and workers politics

**W**HE have said that our fighting men ask no quarter. But there are those who do. I think of the self-styled pacifists at home, who in the name of "peace" try to convince us that anything but fascism is the primary evil reeking for this war. That, for instance, is the essence of the so-called "peace offensive" launched on D-Day eve by Norman Thomas' Socialist Party. Both Thomas and Burlington Hoops, a leader in the Fellowship of Reconciliation, are president and vice presidential candidates on that Party's election ticket.

Are we fighting Nazis and secretaries-in-distress in death, destruction and world conquest? Of course not, say the platonic of these pacifists. American youth are fighting to "save the British Empire and to have a Balkanized Europe" which will be "dominated by Russia." Consequently, they conclude we must have "a Germany that we can deal with." Do you not get the familiar scent of the delectable *Dark Night*, who, on the eve of the

gh War Loan Drive, dared to say in America's name, that the "hardships" for Americans are "too great!"

**I**T IS well to remember when we hear such things, that the time is not so long past, when in the name of "peace" a Chamberlain flew to Berneseburg and came back with a promise of "peace in our time." He appeared Hitler by selling out Czechoslovakia, pleading that the democrats were "unprepared." There is the cue to the moral results of pacifist pronouncements. There would come no morality in the face of the "organized peace with Hitler" drive of America's enemies.

But that's not the whole story. For today, the only instance of Hitler against decency is decency. That's why we see road work would shudder against our allies we can see that such pacifist pronouncements are really not religious scruples, but, in fact are completely unscrupulous political motives.

Pacifist pronouncements today are completely indistinguishable from those of the abolitionist and defunctist meetings against our allies. They lie hand in glove with the "peace now" movement aimed at preventing the destruction of Hitler. And, as in the case of Hoops and Thomas, these individuals are part of this movement. Thus "pacifism" have become to ventriloquist exercises of the peace, for were they successful in their aim, peace could not be established on an enduring basis.

**B**UT this young generation is showing that they love peace well enough to be determined to fight with arms against the fascist victors of the peace so that fascism shall be utterly crushed. This is what our Commander-in-Chief recently reminded us of when he remarked that what is unfolding on the invasion beach-head is the only and purpose registered in Tolstoy.
